Summary

AI & Software Engineer with hands-on experience in Generative AI, QA Automation, and Enterprise SaaS applications. Experienced in building AI-driven solutions, developing Playwright automation frameworks, implementing LLM-powered test automation, validating enterprise workflows across AppCentral, Salesforce, Flowable, and M2M, and performing end-to-end product testing. Skilled in Python, TypeScript, Playwright, Machine Learning, and enterprise product validation with a strong foundation in software engineering and automation.

Experience

- **Associate Engineer AI Intern| Aptean India Pvt Ltd** (Oct'25 - Oct'26)
  Building an AI-powered test automation system with intent mapping and self-healing locator strategies using Playwright and LLM integration.
- **Intern | Machine Learning | EvolveTech** (Jun'25 - Sep'25)
  Developed an AI-powered English learning assistant with TTS/STT using custom-trained models, applying OOP principles in Python for a clean and scalable backend.
- **Intern | Machine Learning | Skillicon Technologies** (Nov'24 – Jun'25)
  Worked on a *Prognostic of Automobiles* project with a focus on *Driver Behavior Analysis*. Applied ML models to predict maintenance needs and assess driver habits for enhanced safety and efficiency.
- **Intern | Machine Learning | Suvidha Foundation** (Oct'23 – Nov'23)
  Completed a Machine Learning internship, applying algorithms and demonstrating strong problem-solving skills in a productive learning environment.
- **Tutor & Founder | Knowledge is Power Tutorials, Bnglr** (May'22 – Present)
  Launched KIP Tutorials at 17, providing tailored educational resources and ensuring academic improvement for diverse student needs.
- **Educator & Tutor | Cloud Education Center, Bangalore** (Apr'24–Aug'24)
  Trained ICSE and 2nd PU students in technical and non-technical subjects, simplifying complex topics to enhance understanding and performance.

Achievements

- **Winner – Aptean AI Hackathon** (Sept 2025)
- **Master of Ceremonies** (MC) for VTU Fest with 5000+ audience
  - Introduced Kannada film celebrities on stage (Mar 2024)
- **Winner – Enigma Hackathon** (Among 100 Teams) (Dec 2024)
- **Finalist – IEEE Webathon** (July 2024)
- **Participant – Python Full Stack Hackathon** (Jan 2024)

Skills

- **Automation Using Playwright & Testing**
  Playwright (Python, TypeScript), Page Object Model (POM), UI Automation, Advanced Locator Strategies (XPath, CSS, automationId), Self-healing & Fallback Locators
- **Programming & Development**
  Python, JavaScript, Java, C, RaeactJS, Flask, HTML, CSS, SQL

- **AI / ML & Data Science**
  LangFlow, AI Agents, Intent Mapping, Machine Learning, Deep Learning, NLP, LSTM, CNN, Logistic Regression, Clustering, PCA, LDA, Feature Engineering, Data Preprocessing
- **AI + Automation Systems**
  LLM Integration (Azure OpenAI), Prompt Engineering, Intent Mapping Systems, AI-driven Test Automation
- **Frameworks & Libraries**
  TensorFlow, PyTorch, scikit-learn, Streamlit
- **Development Practices & Databases**
  SDLC, Agile, MySQL, MongoDB
- **Tools & Platforms**
  Salesforce, Flowable(IAM), Azure DevOps, VS Code, PyCharm, Android Studio, Git, Linux (Ubuntu)

Projects

- **Aptean HR Assistant –** AI-powered hiring solution: Built a recruitment platform with bulk resume parsing, JD matching, candidate scoring, diversity analysis, dashboard insights, and automated email notifications via SMTP
- **MedAlert –** Smart Medication Management System: Developed a Python & Flask web app with SQL backend and Android platform to detect harmful drug interactions, identify and count pills via computer vision with 3D visualization, and provide native language conversational AI reminders.
- **Shrikaa AI:** Developed an AI-powered educational chatbot.
- **Prognostic of Automobiles:** RaspberryPi, CAN Module, AWS, certain ML models to predict failures.
- **Stock Market Price Prediction:** LSTM, LDC, Logistic regression(major ML algorithms)
- **AgriScan –** Smart Crop Disease Detection App
- **Research Papers & Publications**
  [1] MedAlert - IEEE paper on an AI-powered medical alert system. **[2] Driver Behaviour Analysis -** IEEE paper on AI-based driver behavior monitoring. **[3] AI in the Detection of Medicinal Plants -** Research paper on AI-powered medicinal plant identification.
- **Database Management System Mini Project:** Developed an E-Commerce website.
- **Data Visualization Project:** Designed an interactive Tableau dashboard.
- **Machine Learning Projects:** Implemented various machine learning techniques in Python.

Certification

SWAYAM-NPTEL: Python, Java, DBMS, Data Analytics, Ethical Hacking, Cloud Computing
Infosys Springboard: AWS, Git, Python
Great Learning: DevOps, Algorithms in C

Education:

Global Academy of Technology, Bangalore.
BE in Artificial Intelligence & Machine Learning — **CGPA :** 9.13 | 2026

2nd PU | PCMB | **RNS Comp PU College, Bangalore**. — 92.83% | 2022

SSLC | Govt. High School | Moodugiliyaru, Kota, Udupi . — 93.76% | 2020

Hobbies & Interests:

Anchoring, acting, traveling, dancing, mentoring students, continuous learning, music, cooking.
